but the US Air Force plans to have a single pilot operating up to four drones at a time.

Yes, Benya does publish a few things that can be confirmed to be valid and at times even insightful.

In these studies, the lowest dose of Paxil CR, 12.5 mg per day, was significantly better than placebo in reducing the emotional and physical symptoms of PMDD.

Whatever the character feels - loss, love, fear, determination - the actor draws from the emotions of their daily lives.
